

## *Info Flash: Trading*

### **Modification of tick sizes in certain segments**

Following the implementation of multi-decimal trading on NSC marketplaces, the Luxembourg Stock Exchange has also put in place new tick size values for a number of instruments.

This modification only concerns the following:

- - **Index 13 for UCITS and Warrants (0.0001 instead of 0.01)**
- - **Index 14 for bonds (0.001 instead of 0.01)**

An updated list of trading groups with the new trading references can be downloaded from the Luxembourg Stock Exchange website in the section "Services" > "Market description" (document name: Trading Groups).

It is important to note that the effective **date of implementation on Luxembourg Stock Exchange will be 28 January 2008.**

All ISVs have been already informed, however the Luxembourg Stock Exchange recommends that Members contact their ISV to avoid any misunderstanding.

Thank you for your cooperation.
