

PLUS – Perma Link Upload Service

The EU Prospectus Regulation stipulates that any documents incorporated by reference into a prospectus must be referenced by a hyperlink. This hyperlink must be valid and accessible for a period of at least 10 years and point directly to the document being incorporated.

This is where PLUS comes to the assistance of the issuers by providing them with a service that guarantees the validity and accessibility of a hyperlink for a period of 10+1 years. In a few, simple steps, issuers can easily generate hyperlinks to the documents incorporated by reference, which are then stored on LuxSE's secure database.

Advantages of PLUS

- ✓ Secures 10+ years hyperlink lifespan
- ✓ Streamlines prospectus creation
- ✓ Ensures precise and direct access to the selected documents
- ✓ Now available as self-service with the option of online payment

Generate instant hyperlinks through the self-service feature

To access and use the PLUS self-service, all you need is a MyBourse account. Once you have a MyBourse account, the process of hyperlink generation is intuitive and allows issuers to take the worry out of the incorporation of external information into their prospectus. Simply follow the instructions on-screen and once complete, your hyperlink will be generated and ready to use immediately.
