In accordance with the Luxembourg legislation* implementing Article 21 (1) of the European Union Directive 2004/109/EC of 15 December 2004 on the harmonization of transparency requirements, issuers with securities admitted to trading on a regulated market should file and store regulated information and ensure effective dissemination of such information to the public within the European Union.

The CSSF (the banking and financial activities supervisor and regulator in Luxembourg) has published in page 5 of its Circular 08/337 of 6 February 2008 an exhaustive and explicit list of regulated information** to be published (www.cssf.lu).

In order to help issuers to fulfil their filing and storage obligation, the Luxembourg Stock Exchange offers a storage mechanism called "BdL OAM Service" that allows them to automate the filing, indexing and storage of Regulated Information and to make it publicly available.

For information about the fee structure relating to the Luxembourg Stock Exchange "BdL OAM Service", please refer to appendix A of the contract.
